NEWS EMBARGOED UNTIL: Friday, February 6, 2004

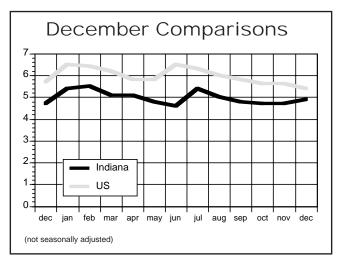

Indiana's preliminary unemployment rate is 4.9% for December compared to National rate of 5.4%

Indiana's non-seasonally adjusted unemployment rate for December is 4.9 percent, five-tenths of a percentage point below the national rate of 5.4 percent, Alan Degner, Com-

missioner for the Indiana Department of Workforce Development, announced today. The number of Hoosiers employed during December 2003 was 3,031,400.

Indiana's December unemployment rate was lower than Illinois, 6.3 percent; Michigan, 6.7 percent; Ohio, 5.5 percent; and Kentucky at 5.1 percent.

"We continue to see Indiana's unemployment rate remain relatively low, especially when compared to our neighboring states," said Degner. "While no one

industrial sector stood out as having seen a substantial decline in jobs from November, several did make small adjustments. And many of those are likely to be temporary seasonal layoffs that happen every year at this time."

The monthly survey of 7,500 Hoosier employers reports payroll employment at 2,900,900 a decrease of 8,300 from one year ago and 1,700 less than last month. Payroll employment is an estimate of non-agricultural jobs in Indiana businesses. It differs from labor force employment which is used in the calculation of the unemployment rate by not including the self-employed and agricultural workers. In addition, payroll employment includes all those who work in Indiana, while the unemployment rate is calculated by those who live in Indiana.

Manufacturing employment totals 574,800 in December, a decrease of 11,800 from last year. Motor vehicle manufacturing accounts for 13,600 jobs, 500 more than one year ago. Manufacturing of motor vehicle parts totals 78,000. Machinery manufacturing in December accounts for 44,000 Hoosier jobs, 500 more than November.

Construction employment totals 147,200 a decrease of 2,000 from last month. Of that, heavy construction reports 17,200 jobs, 1,200 less than last month.

Service producing employment totals 2,171,800 in December, 8,400 less than last year. Transportation and public utilities total 119,800, 800 less than November.

Retail trade totals 351,000, 700 less than a year ago. Of that, general merchandise stores report employment of 80,900, or 2,500 less than last year.

Indiana's estimated labor force (the number of people 16 years of age and older who are able and available for work) totals 3,188,100 in December 2003. An estimated

Industry Payroll Employment

Selected Categories	December 2003	Change from Nov 2003	Change from Dec 2002
Goods Producing	731,800	-1,700	+100
•Construction	147,200	-2,000	+11,900
•Manufacturing	574,800	+400	-11,800
Service Producing	2,171,800	0	-8,400
•Retail Trade	351,000	+1,800	-700

3,031,400 Hoosiers are employed and 156,700 are unemployed.

Indiana's labor force for December 2002 totaled 3,160,000. Hoosiers employed one year ago is estimated at 3,0007,200 and December 2002 unemployed in Indiana totaled 152,800. Indiana's estimated unemployment rate one year ago was 4.8 percent, compared with the national unemployment rate of 5.7 percent in December 2002.*

*Due to an expansion in the Current Population Survey (CPS), mandated by Congress, estimates for June 2001 (revised) and later at both the state and substate levels may not be fully comparable with those of earlier periods. In analyzing data, be aware that over-the-year comparisons, may differ slightly from comparisons that would have been made using data without the sample expansion. More detailed information can be found at http://stats.bls.gov/launews1.htm.
